

Brinklow Parish Council
Neighbourhood Development Plan
Update

- Following the meeting held on the 11 February with Rugby Borough Council, a number of volunteers from the village put themselves forward to create a subcommittee of Brinklow Parish Council to look at the benefits of creating a Neighbourhood Development Plan (NDP).
- This subcommittee has met with Rugby Borough Council and having looked at available information is of the opinion that a NDP would give the village greater influence over future housing development.
- A NDP cannot stop housing development, but can influence the type and design of houses that are built, protection of green spaces and local amenities etc.
- The subcommittee are proposing to provide residents with information that explains what a NDP is and the opportunity to ask questions through organised drop in events. The development of the NDP is time consuming and will require the commitment of the village.
- We are therefore proposing to organise a village referendum to ask whether you support investment of time and money in a NDP. Towards the middle of May, residents will receive information that explains the NDP and how to take part in the local referendum.
